SKILLS

Ruby, Rails, JavaScript (ES6), Angular, Ember, React, Node, SCSS, and many more

EMPLOYMENT

FocusVision · Software Engineer
Portland, OR · Sep 2016 to Sep 2017
- Full-stack, mid-level web developer
- Rails back-end, generally implementing the JSON API standard
- Ember 2.x front-end, occasional React + Redux
- Personally advocated for and implemented accessible interfaces across several apps
- Created and maintained rich single-page apps, both greenfield and not, both mobile and desktop

Notch8 · Junior Web Developer
Portland, OR · Apr 2015 to Mar 2016
- Worked on a wide variety of projects using many different technologies. Generally focused on Rails-api with an Angular front-end.

Dev Bootcamp · Teaching Assistant
San Francisco · Mar 2015 to Apr 2015
- Hired immediately after graduation by Dev Bootcamp as a TA to teach students JavaScript and Ruby fundamentals.

PROJECTS

Forest
2016 to Current
My solo project. Still under development, the final product will be a fully-decoupled app with a React + Redux front end.

Stop & Listen
2013
A computer game created in a two person team from start to finish in 48 hours for the 2013 Global Game Jam.

VOLUNTEERING

Lines for Life · Crisis Call Worker
Jan 2017 to Current
I answer calls from people in a great variety of crises, helping to keep them safe from suicide or drug abuse. I went through months of training to be able to do take calls, and also received an ASIST certification. This work is more challenging than I imagined, but extremely rewarding.

Code Oregon · Lab Tutor
Jun 2016 to Current

OpenSource Bridge · Talk Monitor and Hacker Lounge Assistant
Jun 2016 to Jun 2016

EDUCATION

University of California, Santa Cruz
BA History of Asia with a minor in East Asian Studies 2013
Additionally completed all available lower division computer science courses.

Dev Bootcamp, San Francisco
Intensive Web Development Program 2015
